

Hammerlit Stainless Steel Case Carts

Features

- Hammerlit stainless steel hospital case carts are ideal for use in theatre and central sterile departments.
- Available in 6 different sizes, Hammerlit hospital case carts are available with; Fixed or adjustable shelves, Height adjustable slides for sterile containers or ISO-Trays, Fixed (welded) U-slides for ISO-Trays and available with Polymer ISO-Tray panels.
- Hammerlit stainless steel case carts are the perfect shuttle transport cart or to be used as a shuttle rack.
- The Hammerlit case carts body is welded watertight with smooth internal construction providing easy cleaning for infection control purposes.
- Featuring double-wall doors with rubber sealing, 4 vertical push handles two of which are integrated in the door hinge, allowing the door side handle to swing with the door and a lower PE bumper to safely navigate around tight spaces.
- Hammerlit stainless steel case carts are easy to mobilise with the large 160 mm diameter, zinc-chromated, easy to roll swivel casters with elastic tire tread. These precision ball bearing casters feature dust guards and two with brake for secure parking. Other caster options available are; Double braked, Central brakes or Directional lock with stainless steel housing and 200 mm diameter.
